Quick n Dirty Spotify Graph

1. Get Spotify Data

Go here, scroll down to 'Download Your Data'
Check 'Extended Streaming History' and click 'Request Data'

You'll have to wait a couple hours for the email from Spotify

2. Run rolling_window.py

I'm assuming you have python, but you might need to install some stuff. Run this in the terminal:

```
pip3 install pandas plotly
```

Make sure you set PATH_NAME to your data folder. You can also tweak the other variables to change the graph
